

Revit API Expert Roundtable: Open House on the Factory Floor

Join the conversation #AU2017

About this class

Interact with a panel of Revit API experts to answer your questions and discuss all relevant topics of your choice. For anyone writing add-ins for Revit software, this is the perfect forum to better get to know the people who shape the APIs you work with and explain your views, ideas, and problems face to face. Please note that prior .NET programming and Revit add-in development experience is required. This class is not suitable for beginners

Check the panel notes on the handout

Make anything.
